**Longtail**  
AVIATION

# Do you currently have a Bermuda Registered Aircraft?

## Are you an Aircraft Owner or Prospective Owner?

### Take **Advantage** of **Our Advantage**...

With a Bermuda-registered aircraft on the Longtail Aviation Air Operator's Certificate (AOC), you have all the advantages of the Bermuda registry coupled with access to worldwide charter revenue, operational anonymity, the highest standards of safety, access to a network of the largest brokers around the globe and international credibility.

Longtail has over 16 years of experience in the worldwide aviation arena, having operated aircraft ranging in size from turboprops and light jets to Boeing Business Jets. Longtail was the first non-US carrier to achieve the **ARG/US Platinum** rating, and was the first certified Bermuda **CAMO**, holding certificate number **BDA/CAMO/001**. Our operations and management organization works for you — the owner.

Longtail Aviation is the ideal candidate for assisting with the registration of a newly acquired aircraft regardless of where the aircraft will ultimately be operated - with a fleet of managed aircraft that routinely operate to and from well over 85 countries.

Longtail Aviation is **not** a boxed management program. We are small, flexible and personal. Our customers are unique, which is why each of our management programs is uniquely crafted to meet our clients' specific needs.

*Contact us for a proposal.*
